Serpent in the St Lawrence river

So this one summer day it was the evening and my mom and aunties were swimming in the river. It was 7:00 pm when they started to jump in and my auntie Kelly jumped in a little bit deeper. She was wondering what she was feeling it felt like huge scaly skin so she opened her eyes and seen a massive serpent the serpent had scaly skin and orange eyes and slimy teeth so sharp it can bite thru rocks and was 10 feet long so Auntie Kelly was paralyzed with fear cause she thought the serpent was gonna eat her. But thankfully the serpent didn't acknowledge them and swam off. She went out of the river because of how scared she was. She didn't want to tell her sisters because they would get scared and never wanna swim in the river. So she kept it to herself because she knew everyone wouldn't believe a 19 year old girl but she couldn't forget that she saw a serpent in the St Lawrence river and she finally told her sister a couple years later and that's why she doesn't swim in the St Lawrence river anymore.
